## TECHNICAL SKILLS

	● ● ●	● ● ○	● ○ ○
Languages	Python, Rust, Ruby	Java, TS/JS, GoLang	Scala, C++, C, Haskell
Technologies	AWS, Terraform, Docker, Make	Bazel, OpenGL, WebGL	Nginx, Jenkins
Frameworks	GraphQL, FastAPI, Rails, Sinatra	Node.js, Express.js, Three.js	A-Frame, React
Databases	PostgreSQL, MySQL, DynamoDB	Redis	MongoDB

## PROFESSIONAL EXPERIENCES

Senior Software Engineer @ **ALT.xyz**, San Francisco

2021/04 - Present

- With a team of 3 engineers, launched the Ledger service that handles all banking-related activities and money movements for the Alt Exchange Platform with an average monthly GMV of \$5 millions
- As lead infra engineer, built key infrastructure across all 3 teams, including monitoring, CI/CD, build/deployment pipelines, and ETL pipelines
- Continuously led efforts to improve developer productivity; Projects include personal development stacks on AWS and CLI tools that saw adoption by the whole engineering team

Senior Backend Software Engineer @ **Ubiquity6**, San Francisco

2019/04 - 2020/07

- Launched Display.land - an unique photogrammetry app with 3D, AR, gameplay, and social components
- Part of a team that built the app from idea to launch in six months, and grew it to 500k users with a robust and scalable serverless AWS stack
- Delivered major app features and services such as location search, short-code generation, and space trailers using GraphQL/Apollo, API Gateway, Lambda, ECS, and Step Functions
- Established and maintained key infrastructure pieces such as DNS, CDN, and databases using Route53, CloudFront, and DynamoDB
- Uplifted engineering culture and raised code quality by introducing a team-wide BDD testing standard

Backend Software Engineer @ **LinkedIn**, San Francisco

2013/07 - 2018/10

- Designed and implemented LinkedIn's video and document processing pipeline that handles millions of requests per day
- Contributed to SlideShare's GDPR compliance by auditing and securing its public API and cleaning up 400TB of non-compliant user data
- Created AWS infrastructure and deployment system with Terraform, Packer, and Jenkins for housing SlideShare's rich media conversion system
- Created a scalable system that is responsible for detecting the language of slideshows uploaded through SlideShare

Software Engineer @ **Side Effects**, Toronto

2012/09 - 2012/12

Software Engineer @ **Google**, Mountain View

2012/05 - 2012/08

Software Engineer @ **Electronic Arts**, Redwood City

2011/09 - 2011/12

## PROJECTS

<https://github.com/LanJian/Raytracers>  
Ray tracers in various languages

<https://github.com/LanJian/Coffee2D>  
HTML5 2D game engine

<https://github.com/LanJian/Surreal>  
Interactive world with a surrealist vibe

## EDUCATION

Bachelor of Computer Science, Fine Arts Minor @ **University of Waterloo**, Canada

Class of 2013
